Re: Utility Rate Study

---

The purpose of this memorandum is to summarize the utility rate review presented to Council and to provide a recommended direction for adjusting the City's water and wastewater rates. The accompanying PowerPoint presentation was used to walk through system conditions, cost trends, regional comparisons, and long-term capital needs.

## **Background**

Water rates were last adjusted in 2018, and wastewater rates were last adjusted in 2015. Since that time, the City has experienced significant increases in operating costs, including labor, materials, equipment, chemicals, and energy. In addition, the City is planning for major long-term capital investments necessary to maintain reliable service and regulatory compliance.

On the water side, the system includes a substantial amount of aging cast iron mains installed in the 1950s and 1960s that have been identified for replacement due to reliability concerns. The City has also begun planning for a future additional water supply source to meet long-term demand.

On the wastewater side, system planning has identified the need for major capacity improvements, including a forthcoming interceptor project that will be financed through long-term bonding.

### **Cost Escalation and Inflation**

Operating and maintenance costs for both utilities have increased at a rate exceeding general inflation. Personnel costs, treatment chemicals, materials, and contracted services have all seen sustained upward pressure. The proposed usage rate adjustments are intended to account for these inflationary impacts and ensure that day-to-day operations remain fully funded without relying on reserves or deferring maintenance.

### **Rate Structure Approach**

The proposed rate structure continues the use of a two-part rate model for both utilities:

- A per-1,000-gallon usage charge to fund daily operations, maintenance, staffing, chemicals, power, and inflationary cost increases.
- A flat monthly fee charged to all accounts to fund long-term capital improvements through bonded debt and yearly capital projects.

This approach ensures that capital projects are funded equitably by all system users while keeping usage rates focused on operational costs.

### **Financial Considerations**

The flat monthly fees are directly tied to anticipated annual bond payments for major capital projects that are financed over time, such as large system improvements and capacity expansions. In addition, these fees support recurring, pay-as-you-go capital investments that are budgeted annually, including ongoing water main replacements, well rehabilitation, and other system renewal projects. This approach provides stable, predictable funding while allowing the City to address both long-term infrastructure needs and routine capital maintenance in an efficient, planned manner. Usage rate adjustments are intended to account for inflation and rising operational costs, as demonstrated in the presentation through historical cost data and regional rate comparisons.

Even with the proposed adjustments, Haysville's rates remain competitive with surrounding communities when evaluated at typical residential usage levels. The average residential usage is 3,100 gallons per month.

### **Recommended Rate Adjustments**

Staff recommends the following adjustments for Council consideration:

#### Water

Per 1,000 gallon usage rate: Adjust from \$3.50 to \$5.00

Monthly water infrastructure fee: Adjust from \$7.00 to \$10.00

#### Wastewater

Per 1,000 gallon usage rate: Adjust from \$7.25 to \$8.75

Monthly sewer fee: Adjust from \$5.00 to \$13.00

These adjustments are intended to stabilize utility finances, support ongoing system maintenance, and ensure the City can meet current and future infrastructure needs without frequent rate changes.

**Recommendation**

Staff recommends Council review the information presented and provide direction on adoption of the proposed water and wastewater rate adjustments.

**SUBJECT:** Façade Grant Program

## Purpose

The purpose of this memorandum is to present a proposed Façade Grant Program for Council consideration, discussion, and approval. The program is intended to support reinvestment in commercial and industrial properties within the Haysville city limits by encouraging visible exterior improvements that enhance the community's appearance and strengthen business vitality.

## Background

The city has previously administered a façade grant as part of a broader business incentive program. That earlier program was from 2011 to 2015. The grant was allocated at \$50,000 for 2011 and 2012. In 2013 through 2015, it was adjusted to \$25,000. Over the five-year grant period, the maximum amount applied for and awarded in a year was \$15,480; the minimum was \$3,725; and the average annual amount was \$11,413. The grant covered Parking Lot, Training, Façade, Rent Assistance, Underutilized Building (occupancy), Restaurant Grant, and Storefront Revitalization.

In addition to the previous façade program, the City of Haysville currently offers the following active business incentives/grants for your reference:

# MEMORANDUM

---

TO: The Honorable Russ Kessler, Mayor  
Haysville City Council Members

FROM: Georgie Carter, Deputy Administrative Officer

SUBJECT: Personnel Manual Addition

DATE: January 7, 2026

---

Attached for your consideration is the addition of a new part-time position to the Personnel Manual for the Administrative Services Department.

The need for this position is the result of Everfull's recent discontinuation of its role in providing the congregate and homebound meal program. CPAAA stepped in as quickly as possible to ensure continuity of services; however, program details are still being finalized. Under the new structure, CPAAA will provide the meals, while each site is responsible for staffing to coordinate deliveries, serve meals, and collect and report required data.

The city is anticipating an agreement with CPAAA in the next week. Under the agreement, CPAAA is expected to reimburse the city up to \$7,000 to support this position. At this time, it is unknown whether funding will be available beyond 2026. A formal agreement will be presented to the governing body for review and approval once it has been received.

The position will be paid out of the Senior Center budget and will fall under pay band B. The part-time position will work Monday–Friday, 9:00 a.m.–1:00 p.m. The estimated annual cost for this position is approximately \$19,200.

This week, CPAAA began delivering five days' worth of frozen meals to the sites, which is expected to continue for the next three to four weeks. During this transition period, Senior Center staff have been required to assist with coordinating deliveries. Meal participants will not be required to pay for these meals; however, CPAAA will accept donations.

Currently, the Senior Center serves approximately 20 congregate meals onsite and 35 home-delivered meals. Volunteers will continue to assist with the delivery of home-delivered meals.

City staff believe that providing congregate meals is essential for seniors, as these programs help combat isolation, improve nutrition, and support mental well-being. They also offer valuable social interaction and a consistent routine, fostering shared conversation, connection, and peer support that are critical to seniors' overall quality of life.

We are seeking approval of this new part-time position so the City may move forward with the hiring process and continue working with CPAAA to ensure uninterrupted congregate meal services for our seniors.

Please let me know if you have any questions or need additional information.
